LDA Topics

Topic 1

blockchain technology
process application system
blockchain
platform technology
challenge provide design

Topic 2

blockchain
network algorithm
propose node trust
block transaction
number consensus

Topic 3

machine
learning peer
model base
learn method feature
process system

Topic 4

security
control access service
datum
privacy system lot record
information

Topic 5

increase
show high
case
figure time result
value rate
analysis

Topic 6

number
user private
key generate
signature identity
group public
system

Topic 7

type call
create code allow
work token gas
ethereum
example

Topic 8

blockchain network
time
blockchain
network

Topic 9

financial
study
journal social digital
research new
business
market
economic

Topic 10

organization
available human
make
online
public company
platform access different

Topic 11

trust
smart function
contract
smart contract

Topic 12

definition
define set proof
protocol
let party follow
message
send

Topic 13

round
assume
cost vote two
rational
voting result
collusion choose

Topic 14

reward participate
mechanism
value system reputation
stake incentive high
participant

Topic 15

player
game

Topic 16

different
good online type take
information
same account certain
operator

Topic 17

number
model transaction
cost user system
algorithm time
show propose

Topic 18

address
bitcoin network
transaction
exchange fee user
time payment
transactions

Topic 19

china degree
receive
worker vol proc
trans spectrum
conf
scheme

Topic 20

consider
problem operation
unit value form
present coalition define
structure

Topic 21

processor
factor
claim first
long follow apply
level term
implementation

Topic 22

theory probability
equilibrium payoff
strategy nash
game state
channel game theory

Topic 23

computer
location attacker privacy
target
access attack security
analysis
malicious

Topic 24

increase
function problem
utility
game price
profit optimal computing
stackelberg

Topic 25

different
analysis population
dynamic model show
case size
study
selection

Topic 26

information
agent provider
value service
level cost different
decision quality

Topic 27

communication
vehicle mobile
network device
cloud resource
edge task
computing

Topic 28

share
blockchain enterprise
chain cost
information
technology
financial figure
blockchain technology

Topic 29

controller
receive slice
require verifier
information
accept content delivery
publication

Topic 30

client indicate
global owner
storage com
match request
matching include

Topic 31

adversary
random output
secure key
scheme secret
security query
encryption

Topic 32

authorize
download
true city april
apply false
limited univ
restriction

Topic 33

review
field figure author
crossref article
research study analysis
environment

Topic 34

domain
condition
provide paper int
table meet related
public physical

Topic 35

market
seller trading electricity
energy grid
price power demand
buyer

Topic 36

iley nline
iley term ibrary
nline doi ong
rule
iley.com
nline ibrary

Topic 37

mining pool
block bitcoin
power
pool miner
attack mining mine
reward

Topic 38

collection
world nft nfts
asset
metaverse
digital virtual dark
ownership

Topic 39

blockchain technology
blockchain
chain product
platform supply consumer
profit
supply chain
technology

Topic 40

ferrugineous male
fine exs amgs specie
pale faunistics
laccophilus
mesh
