

LDA Topics

Topic 1

transaction record success rate
result show same time game theory
model base reputation value
show figure fog node
game model

Topic 2

niversity ong library erm
ong illey nline library
mobile device
illey nline ong ong
illey.com doi ity niversity
nloaded illey.com

Topic 3

energy storage norungba shen
base blockchain energy trading
blockchain technology smart grid
energy system renewable energy
electricity price

Topic 4

springer heidelberg
lncs vol encryption scheme
datum item hash function private key
public key
vol springer
random number
random oracle

Topic 5

consensus protocol
blockchain network
block size block reward
transaction fee mining pool
nash equilibrium
mining power new block
computational power

Topic 6

blockchain network mobile edge
gacha game edge server ist device
resource allocation
edge computing
stackelberg game
computing resource
optimization problem

Topic 7

license limited
utc xplore
univ download
limited city
restriction apply
city univ
download april
april utc authorize license
xplore restriction

Topic 8

cloud gaming
blockchain game
incentive mechanism
federate learning
energy consumption

Topic 9

springer cham
payoff matrix upper bound initial state
game play central bank key pair
secret key
digital currency
symposium security

Topic 10

improve quality model consider
confirmation time block reward
dynamic game optimal strategy increase profit
service provider
game theory
game analysis
homework analysis

Topic 11

catalogue faunistics
large mesh colour pattern
edge device
datum owner
pale ferrugineous
apical ventrite same datum
description faunistics
dark ferrugineous

Topic 12

smart contract

Topic 13

blockchain technology
supply chain

Topic 14

ethereum blockchain
social media
big datum annals operations
social network
available online
international conference
online access
information technology

Topic 15

distribute ledger
new technology
agricultural product
case study
figure show full node
block hash real estate
previous block operations research

Topic 16

coalition formation
vsamples tilewidth
system model solve problem
computation offload
quality false offload task
vehicular technology
fog computing

Topic 17

article accept
information authorize
redistribution require
permit republication
require permission
personal permit
republication redistribution
permission information
resource trading
incentive mechanism

Topic 18

transaction blockchain
computer science blockchain enable
propose model
blockchain system
generate block https:// security issue
blockchain base
blockchain application

Topic 19

distribute ledger
blockchain smart internet thing
consensus mechanism
blockchain network
blockchain technology
consensus algorithm
access control smart city
security privacy

Topic 20

channel network
transaction process
blockchain service
gas price result show
number transaction
payment channel
cost function
datum block
lightning network

Topic 21

conference computer
preprint arxiv blockchain network
international conference
hash rate
proof work next block
number block blockchain protocol
arxiv preprint

Topic 22

hsamples vsamples
internet thing
false true research interest
true true
true false
energy trading
efactor hsamples
tilewidth tileheight

Topic 23

decentralized application
game game bloom filter merkle tree
private key
third party allow user
https:// new york
blockchain cloud

Topic 24

energy management
demand response utility function
game theory
nash equilibrium
energy market mechanism design
peer-to-peer energy

Topic 25

wired power
artificial intelligence
neural network
machine learning
digital twin deep learning
power plant virtual world
virtual reality
coleoptera dytiscidae
