

LDA Topics

Topic 1

base blockchain
subsidy strategy
model base
show figure
reputation value
same time
decision make
malicious node
network slice

Topic 2

smart contract
blockchain system
international conference
blockchain smart

Topic 3

consensus algorithm
game theory
consensus mechanism
online available
random number
nash equilibrium
power plant

Topic 4

consensus protocol
block size
blockchain network
transaction fee
mining pool
nash equilibrium
new block
computational power
blockchain system

Topic 5

utility function
edge server
smart grid
edge computing
stackelberg game
energy trading
resource allocation
computing resource
internet thing

Topic 6

xplore restriction
april utc
univ download
limited city
restriction apply
city univ
download april
utc xplore
license limited
authorize license

Topic 7

niversity ong
digital currency
financial institution
ong ong
iley nline
nline library
ity niversity
nloaded iley.com
iley.com doi

Topic 8

research paper
proof lemma
achieve high
multiparty computation
ddos attack
commitment scheme
initial state
building block
chain transparency

Topic 9

complete task
ecommerce platform
datum item
mobile device
resource trading
offload task
computation task
recycling model

Topic 10

incentive mechanism
service provider
datum owner
datum storage
datum sharing

Topic 11

blockchain technology
supply chain
blockchain network
blockchain technology
block chain
distributed ledger
digital asset
base blockchain
renewable energy

Topic 12

energy system
international conference
social network
blockchain network
blockchain technology
block chain
distributed ledger
digital asset
base blockchain
renewable energy

Topic 13

pool operator
peer2peer electronic
power battery
committee member
full node
honest node
bitcoin address
transac tions
distributed computing
storage space

Topic 14

correspond author
high profit
solve problem
emission reduction
social welfare
compute power
blockchain necessity
blockchain miner
increase increase

Topic 15

edge device
iot device
machine team
energy consumption
artificial intelligence
smart city
machine learning
management system
internet things
propose system

Topic 16

case study
payment channel
blockchain network
hash rate
figure show
blockchain game
nonfungible token
let blockchain
andv preprint

Topic 17

pool manager
conference computer
random oracle
number block
computer science
rational player
international conference
next block
security privacy

Topic 18

result show
high value
related work
blockchain cloud
bloom filter
number miner
expect utility
interaction among
storage cost
pow puzzle

Topic 19

encryption scheme
secret key
Incs vol
vol springer
public key
private key
hash function
springer heidelberg

Topic 20

apical ventrite
catalogue faunistics
description faunistics
same datum
pale ferrugineous
large mesh
colour pattern
dark ferrugineous
lateral aspect
