

LDA Topics

Topic 1

network
system smart
lot
blockchain
privacy **datum** access
security
application

Topic 2

value
first case give
model two
problem **result** time
consider

Topic 3

information
financial online
company business system
blockchain
technology
digital new

Topic 4

mechanism
datum network
vehicle **model** base
propose **task** node
algorithm

Topic 5

ethereum
bitcoin smart exchange
contract
type feature
transaction
account address

Topic 6

consensus
transaction
node time
number hash
protocol **block**
network
blockchain

Topic 7

provider time
transaction
cost request **user** cloud
service
content system

Topic 8

attack reward
pool game
player **miner** block
mining
equilibrium strategy

Topic 9

education
metaverse learning
technology crossref
research
student **study** review
management

Topic 10

buyer price
market token nft asset
game seller
player value

Topic 11

encryption function
protocol
query party
output **key** message
scheme
security

Topic 12

technology
product **supply** profit
chain cost
blockchain
model information
strategy

Topic 13

electricity demand
market power
energy grid
price trading system
transaction

Topic 14

blockchain
false true vol
mobile **resource**
offload **computing**
network edge

Topic 15

ferrugineous
fine **exs** amgs male
pale **faunistics**
laccophilus
specie mesh
