

blockchain, technology, system	agent, state, task
business, new, digital	network, channel, rate
protocol, define, round	information, software, access
user, transaction, address	key, security, scheme
player, number, reward	model, learning, cloud
system, trust, value	participant, provide, condition
game, strategy, model	financial, technology, risk
datum, privacy, security	limited, apply, city
problem, algorithm, solve	resource, edge, vehicle
node, mechanism, consensus	block, miner, mining
cost, model, function	health, healthcare, figure
change, type, name	true, true true, false
transaction, time, fee	information, publication, require
strategy, equilibrium, game	game, auction, bid
method, study, education	provide, often, same
service, price, provider	vol, true, false
contract, smart, smart contract	energy, power, trading
game, token, asset	chain, supply, blockchain
study, vol, research	ong, nline, ibrary
blockchain, miner, reward	faunistics, laccophilus, exs
