Topic Mixtures

Document / Topic Probability

Legend:
- on value, show figure, same time
- device, iley nline, nline ibrary
- ain technology, smart grid, energy trading
- ey, hash function, vol springer
- ool, nash equilibrium, transaction fee
- mputing, stackelberg game, resource allocation
- on apply, limited city, city univ
- e mechanism, federate learning, blockchain game
- ey, digital currency, central bank
- provider, game theory, optimal strategy
- wner, pale ferrugineous, edge device
- ontract, datum share, datum sharing
- hain, blockchain technology, evolutionary game
- available online, international conference, social network
- case study, figure show, agricultural product
- computation offload, quality false, system model
- require permission, personal permit, permit republication
- blockchain system, propose model, https ://
- blockchain technology, consensus algorithm, blockchain network
- number transaction, payment channel, result show
- hash rate, international conference, proof work
- true true, true false, false true
- private key, third party, bloom filter
- game theory, nash equilibrium, utility function
- machine learning, deep learning, neural network
