# LDA Topics

## Topic 1
consider
value time
case example
take make even
good need

## Topic 2
technology ledger
distribute network application
blockchain
process system transaction
block

## Topic 3
result
number
block user fee
transaction
value time rate
system

## Topic 4
communication
metaverse
provide smart
internet iot cloud
application
security
technology

## Topic 5
share
system china
information
base game model
value strategy
blockchain

## Topic 6
information
share user client
datum owner
request privacy store
storage

## Topic 7
member
participant stake
reward leader
mechanism
incentive
design consensus
participate

## Topic 8
innovation
online new potential
business
available social
world
economy digital

## Topic 9
publication accept
state event
change prior
information
version fully require

## Topic 10
cryptocurrency
network
bitcoin feature
transaction account
address analysis
exchange

## Topic 11
education management
technology
research
study review
process system
development student

## Topic 12
property
model
two allow define
type page
give state
usa

## Topic 13
performance
learning propose
task model learn
method datum action
algorithm

## Topic 14
function
ethereum call
transaction execute
contract
gas cost
code smart

## Topic 15
communication
consensus
vehicle base
node propose
number
network
algorithm

## Topic 16
protocol
player set
game utility
strategy payoff
equilibrium

## Topic 17
restriction
authorize
univ city apply
utc download
limited april xplore

## Topic 18
optimal allocation
game price
buyer resource
utility function
pricing
stackelberg

## Topic 19
proof
adversary message
protocol oracle
output let party input
function

## Topic 20
information
technology
financial
enterprise chain firm research
supply
blockchain
management

## Topic 21
algorithm
security public
random key secure
scheme query
encryption
secret

## Topic 22
worker
malicious task
voting attack vote
reputation peer
trust security

## Topic 23
market
trading electricity transaction
energy
smart power price
demand grid

## Topic 24
digital
virtual token asset
nft game item
nfts player case

## Topic 25
model knowledge
platform
market
profit service quality
value provider
price

## Topic 26
bitcoin
mining reward
mine miner pool
attack block strategy
power

## Topic 27
device
mobile
network resource
task edge true
computing
false offload

## Topic 28
product chain
consumer
blockchain
cost supply profit
technology supplier
traceability

## Topic 29
witness nloaded
rule nline iley
ong
article
doi ibrary
iley.com

## Topic 30
ferrugineous
fine exs amgs
male faunistics
laccophilus
pale mesh specie
