Topic 5
trust management
malicious node
blockchain system honest node
game theory same time
consensus algorithm ddos attack
hash value
network security

Topic 6
digital currency
nonfungible token
real estate block chain
digital asset
https :// create new
bitcoin ethereum
virtual world
real world

Topic 7
transaction blockchain
transaction process
payment channel
figure show
ethereum blockchain
number transaction
personal datum trans action
blockchain service
datum store

Topic 8
base station
datum share
compute resource
mobile device
service provider
machine learning
cloud computing
datum sharing internet things
computation resource

Topic 9
international conference
equilibrium strategy
arxiv preprint preprint arxiv
game theory
nash equilibrium
strategy profile
blockchain protocol
strategy player
conference computer

Topic 10
selection process
optimal value
result show power supplier
propose approach
reputation value
neural network **show figure**
datum information
science technology

Topic 11
resource trading
computer science
consensus process
consortium blockchain
research interest
system model
science engineering
access vol
apply transaction
performance evaluation

Topic 12
edit content
information doi prior final
permit republication
personal permit
permission information
article accept
republication redistribution
final publication
accept publication

Topic 13
consensus mechanism
good response
noncooperative game
nash equilibrium
utility function
equilibrium point game model
stackelberg game
optimal strategy
simulation result

Topic 14
blockchain technology

Topic 15
content delivery
key generation
merkle tree
propose scheme
public key
private key
digital signature key pair
datum provider
transaction information

Topic 16
transaction industrial
cloud server
related work
propose scheme
edge device
datum owner
datum trading
computer science
datum storage
elliptic curve

Topic 17
demand response
electricity trading
renewable energy energy storage
game theory energy market
energy trading
smart grid
electric vehicle
trading system

Topic 18
asset management
management vol
energy node arrival rate
energy vol market size
blockchain system
ecommerce platform
digital transformation
shapley value

Topic 19
springer heidelberg
lncs vol random oracle
hash function full version
public key
datum item
vol springer
secret key
encryption scheme

Topic 20
redistribution require
fully edit waiting time
content change
transac tions
transaction fee
gacha game
confirmation time
change prior
transaction confirmation

Topic 21
rational player
case study
conflict interest figure show
business model
available online
international journal
show figure
literature review
peer review

Topic 22
recycle model
random number
blockchain game
number generation game player game play
play game
third party

Topic 23
